ABOUT THE AIR FORCE RESERVE

The Air Force Reserve comprises nearly 70,000 Reservists. Serving as both a strategic reserve and operational force multiplier, today's AFR has a worldwide mission in support of air and space requirements. The Reserve provides strategic depth and surge capacity for Active Duty while leading several unique missions.

AFR HISTORY

Since its inception in 1948, the Air Force Reserve has been a part of every conflict since the Korean War. From 1950 through 1980, it aided in the Berlin and Cuba crises as well as the Vietnam War, implemented the Total Force concept and began flying modern aircraft alongside Active Duty, and modernized their weapons system inventory with the addition of KC-10s, A-10s, F-4s, and F-16s. During OPERATIONS DESERT SHIELD/STORM in the 1990's, more than 23,500 Reservists were mobilized. In the post-9/11 era, Reservists contributed to Afghan missions and the Global War on Terror, and supported Ukraine and Levant operations. Further modernization is underway with the addition of KC-46s and F-35s to the weapons systems inventory.

Ready Now! - Transforming for the Future!

Ready Now!

- Military members are medically ready, physically fit, and proficient in both their in-garrison and deployed jobs.
- Airmen continue to deliver cost-effective surge capacity for operational use and strategic depth to compete, deter, and win in conflict.
- Civilian workforce acts expediently to ensure our military members have the resources necessary for their assigned missions.

Transforming for the Future!

- Strive for and embrace new tools and processes to effectively resource Airmen.
- The Air Force Reserve will continue to improve operational readiness while also transforming into a Data Dominant Command.
- Leaders at all levels will leverage data analytics to assess options rigorously when making difficult decisions about constrained resources.
