## CONCURRENT AND PROPORTIONAL FIELDING

For the AFR to remain a lethal and fully interoperable Total Force partner, aging fleets must be recapitalized via concurrent and proportional fielding with the Active Component and Air National Guard. New equipment must arrive at Air Reserve units simultaneously with its arrival at Active Component units in proportional shares. The AFR also requires support of bridging strategies from existing aviation legacy missions into emerging Next Generation Air Dominance (NGAD)

## RESERVE PERSONNEL APPROPRIATION (RPA) AND OPERATION & MAINTENANCE (O&M) FUNDING

Critical MEANS to maintaining and sustaining strategic depth enabling the AFR to achieve its primary mission objective – provide combat ready forces

## PREDICTABLE BUDGET

AFR's warfighting ability to Maintain and Sustain Military Readiness, Quality of Life and Build Trust with our Reserve Citizen Airmen depends on the timely allocation of funds. Continuing Resolutions (CRs) hinder AFR readiness and cause an inability to plan and predict participation and degrade our ability to sustain progress

## MODERNIZATION

Ensuring strategic depth and readiness at levels necessary to win in a near-peer conflict requires continuous equipment modernization efforts. In those areas where the AFR will continue to operate legacy fleets, modernization efforts are key to survivability, interoperability, and lethality. National Guard and Reserve Equipment Appropriation (NGREA) make a large impact in this area
